The logo for ETIVERA, featuring the word "ETIVERA" in white, bold, sans-serif capital letters on a green rectangular background.

Confirmation of Compliance with the Heavy Metal Limit pursuant to Regulation (EU) 2025/40

We hereby confirm that all packaging distributed by ETIVERA Verpackungstechnik GmbH which is **not intended for direct contact with food** complies with the total concentration limit for heavy metals laid down in Regulation (EU) 2025/40.

Pursuant to Article 5(4) of Regulation (EU) 2025/40 of the European Parliament and of the Council of 19 December 2024 on packaging and packaging waste, the sum of the concentrations of lead (Pb), cadmium (Cd), mercury (Hg) and hexavalent chromium (Cr(VI)) in packaging or packaging components must not exceed the legally prescribed limit of 100 mg/kg.

Based on the product, material and/or supplier information available to us, we confirm that, for packaging distributed by ETIVERA which is not intended for food contact, the total concentration of lead (Pb), cadmium (Cd), mercury (Hg) and hexavalent chromium (Cr(VI)) does not exceed the above-mentioned limit of 100 mg/kg.

The specific PFAS limits laid down in Article 5(5) of Regulation (EU) 2025/40 apply to packaging intended to come into contact with food and therefore do not apply to the non-food-contact packaging covered by this confirmation.

The assessment of the suitability and legally compliant use of the respective packaging for its specific intended purpose is the responsibility of the user.
